Heat Recovery in Energy Efficient Homes

Saturday & Sunday 12pm

Presenter: Barry Stephens, Zehnder America

Learn why tight, energy efficient homes need mechanical ventilation, and why Heat Recovery Ventilation is the best answer for IAQ, comfort and energy savings.

As new Homes become better sealed with better insulation the old methods of providing for ventilation are not sufficient for maintaining good Indoor Air Quality, comfort for the occupants, a high efficiency heat recovery ventilation can provide all the fresh air needed without the energy penalty of either bringing cold air in, or pushing warm air out.
